

RCO Power

The flexible power installation system for extended office cabling

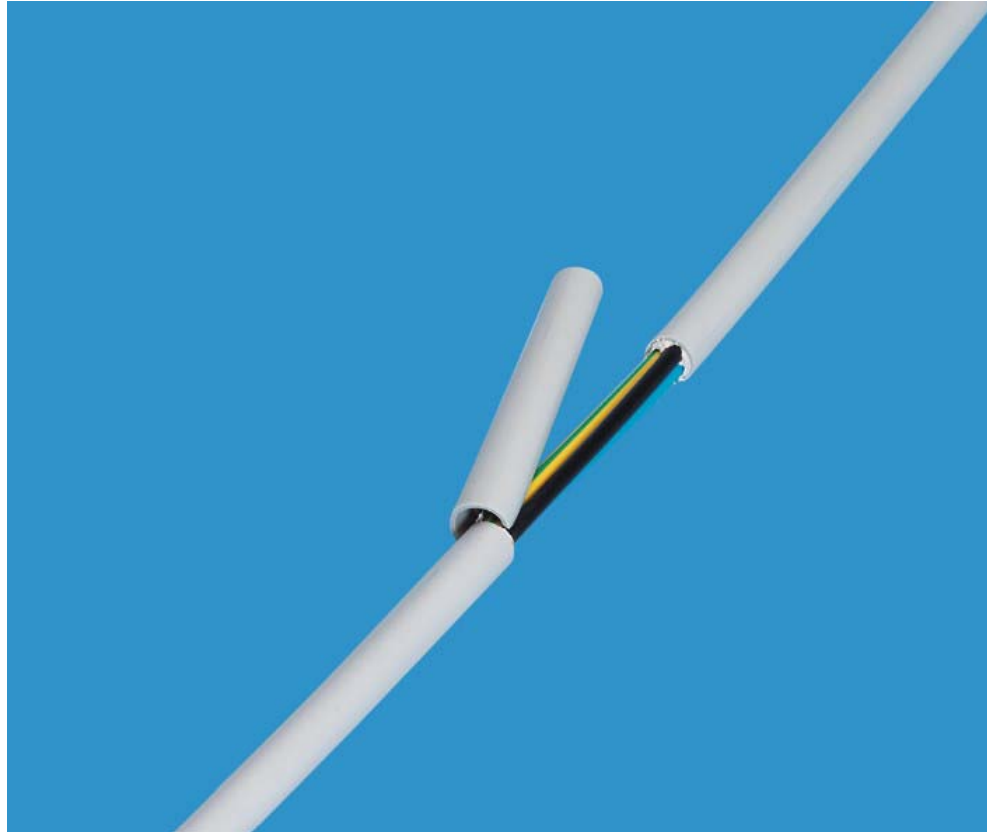

Convincing cabling solutions

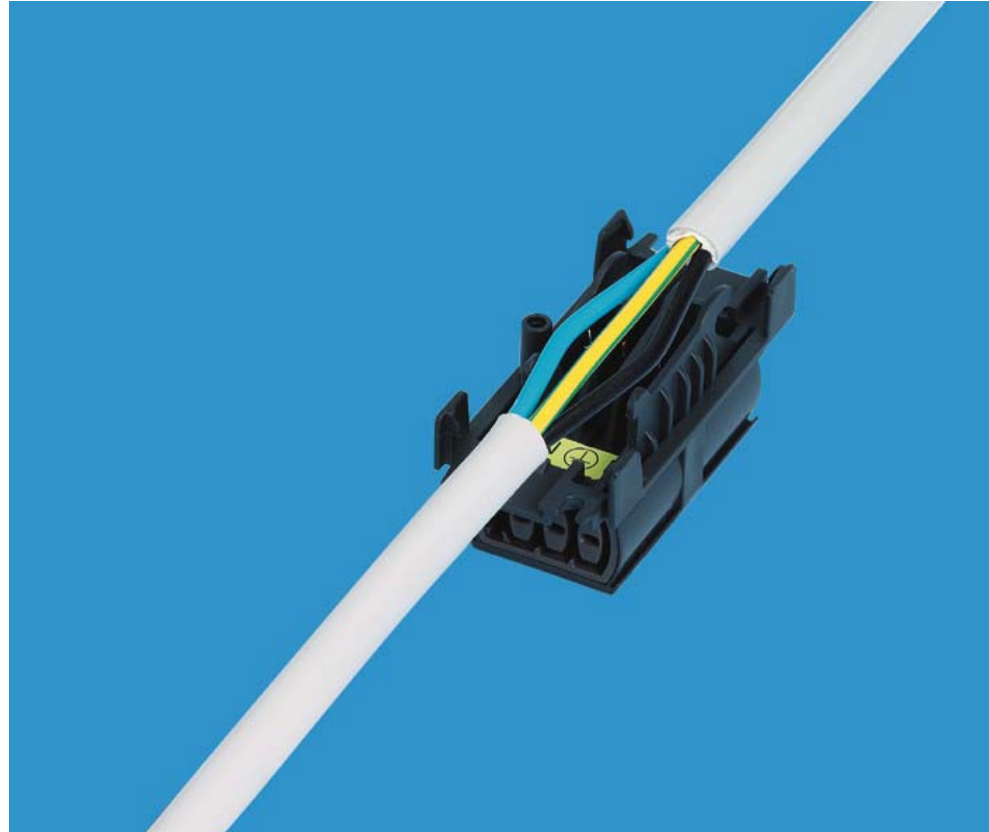

<3-pole Cable Outlet> – the new, smart system for interruption-free tapping into round cables.

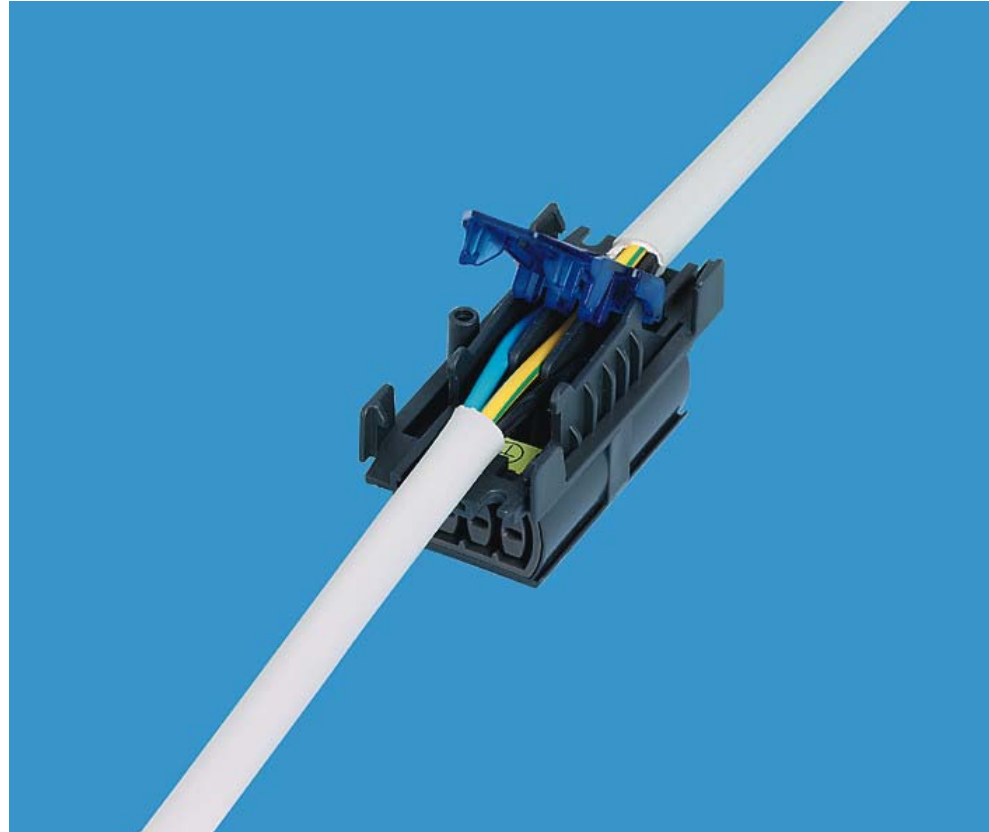

1. Strip 50-55mm of the round cable 3x2.5mm² at any desired point.

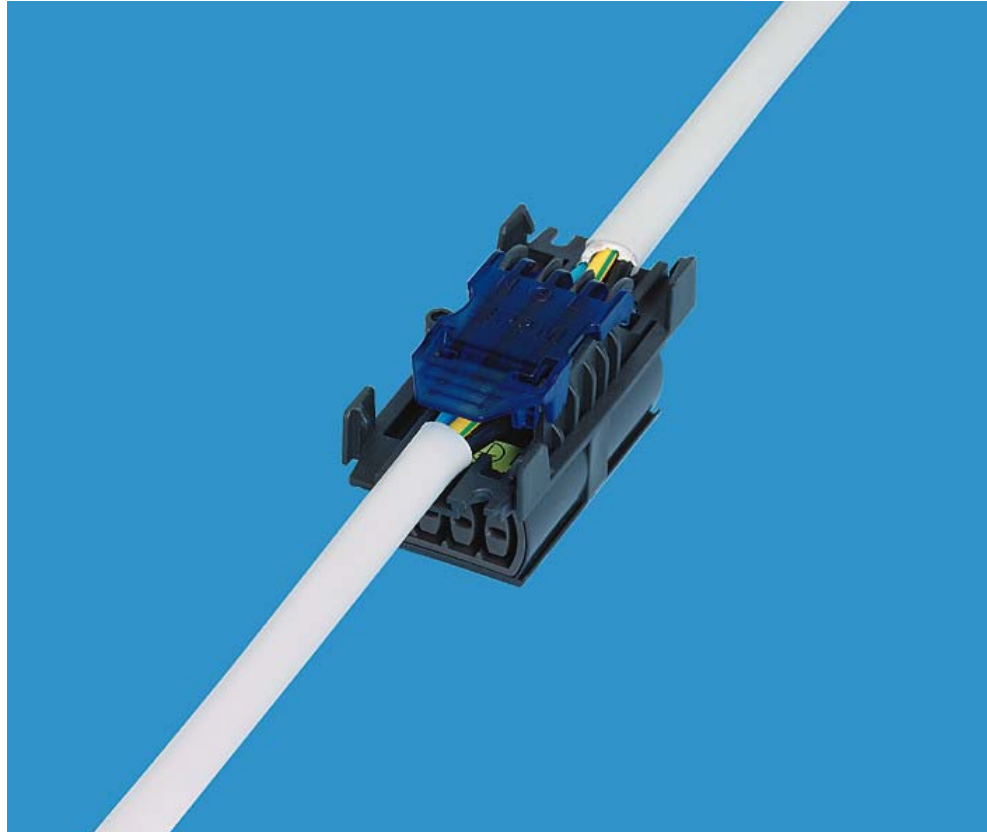

2. Align the wires to match the marking in the CO adapter.

3. Lay the cable in the CO round cable adapter and set the wiring lid on top.

4. Press down the wiring lid till it engages. The contact has now been made.

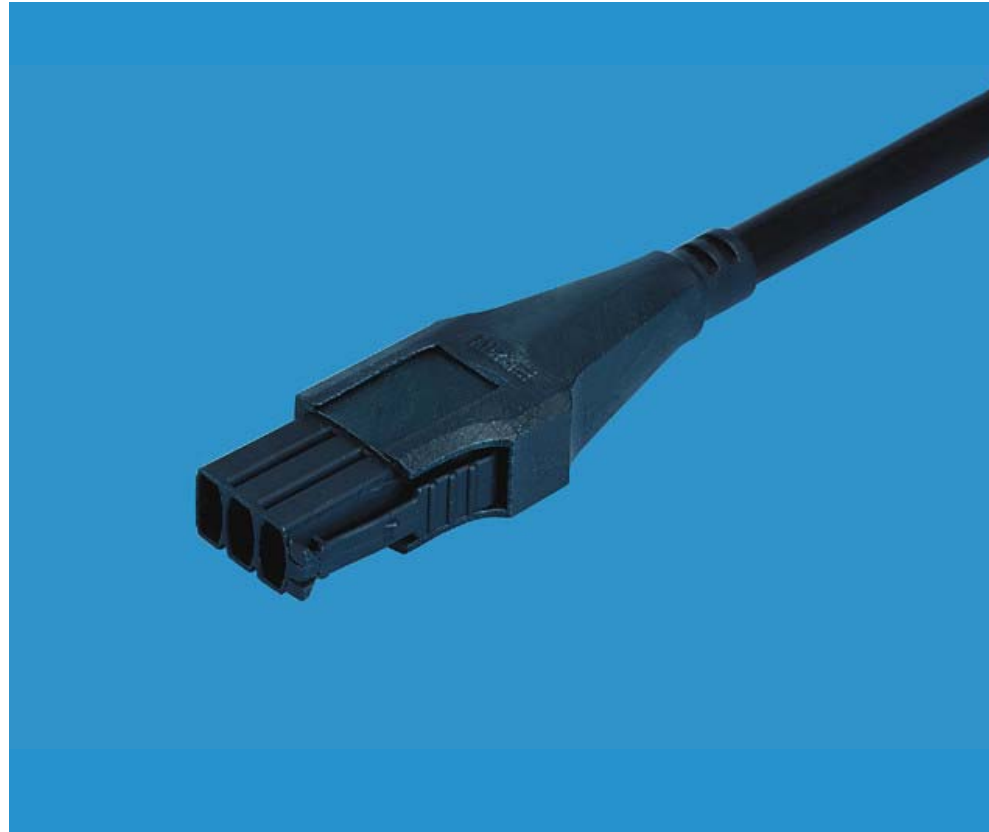

**5. Press open the adapter cover till it engages.
The display window shows the conductors
position.**

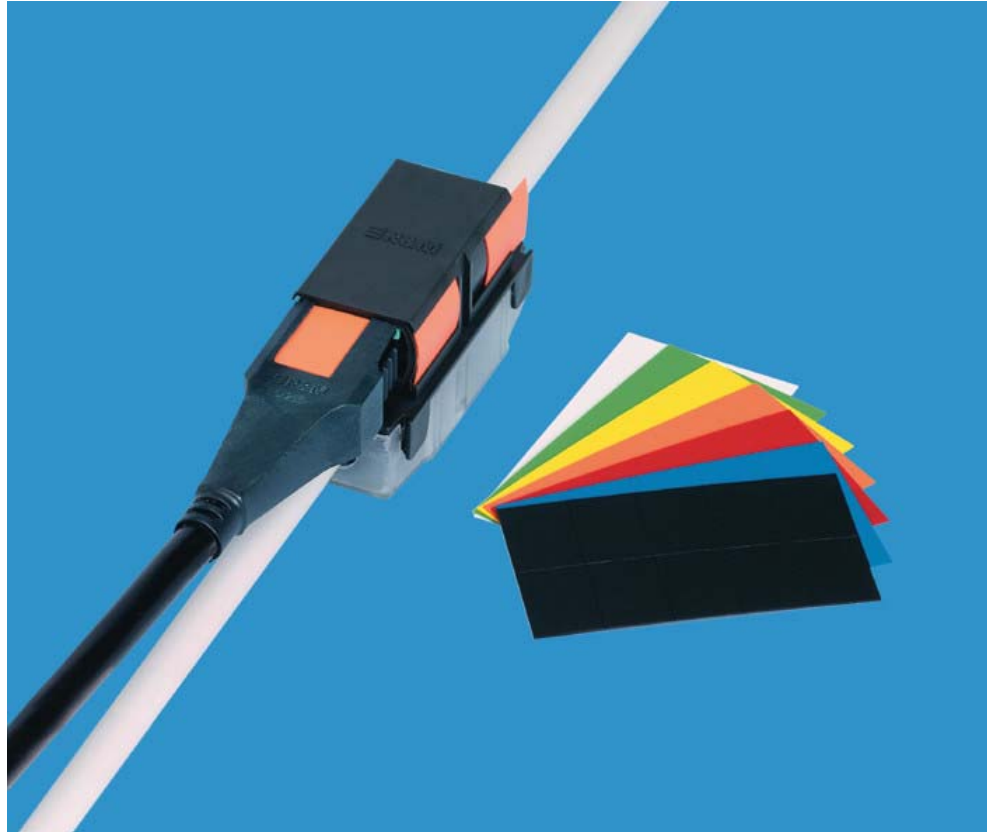

Just 40 seconds to establish two outputs!

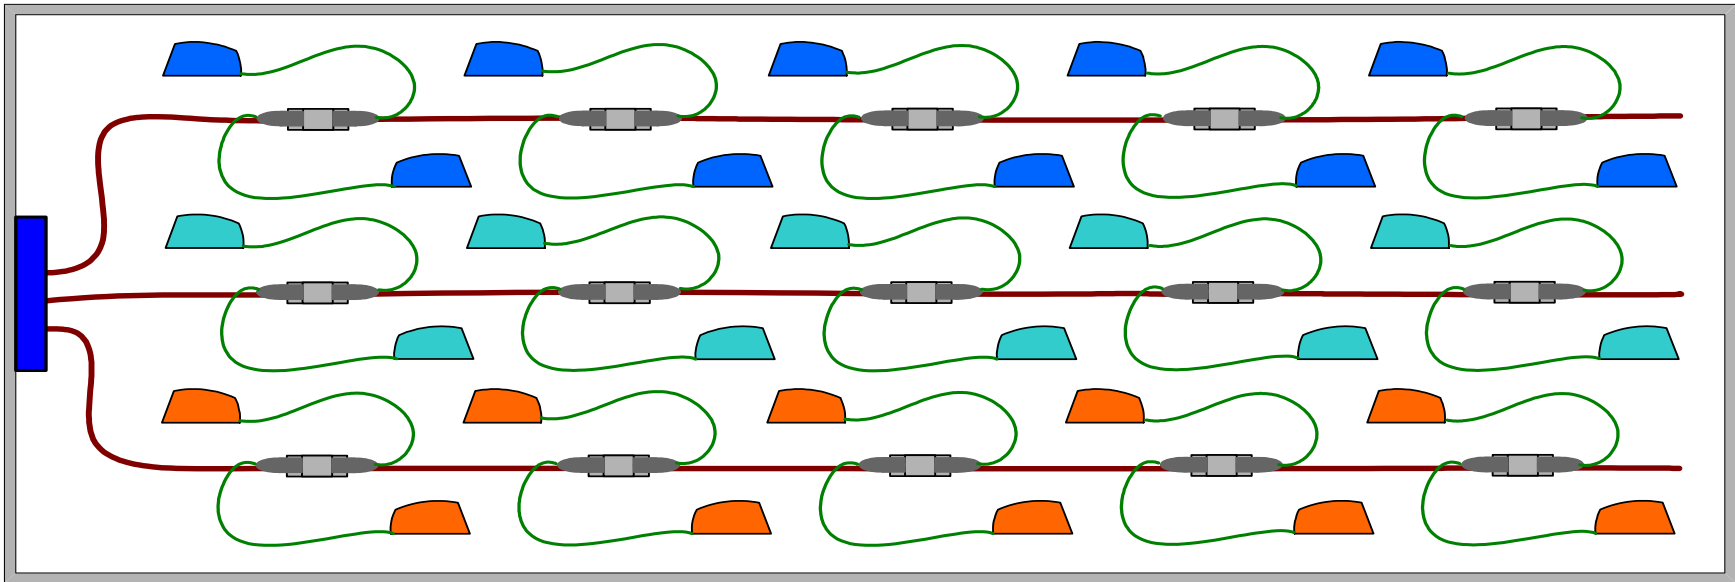

The lock integrated into the connecting cable plug engages automatically.

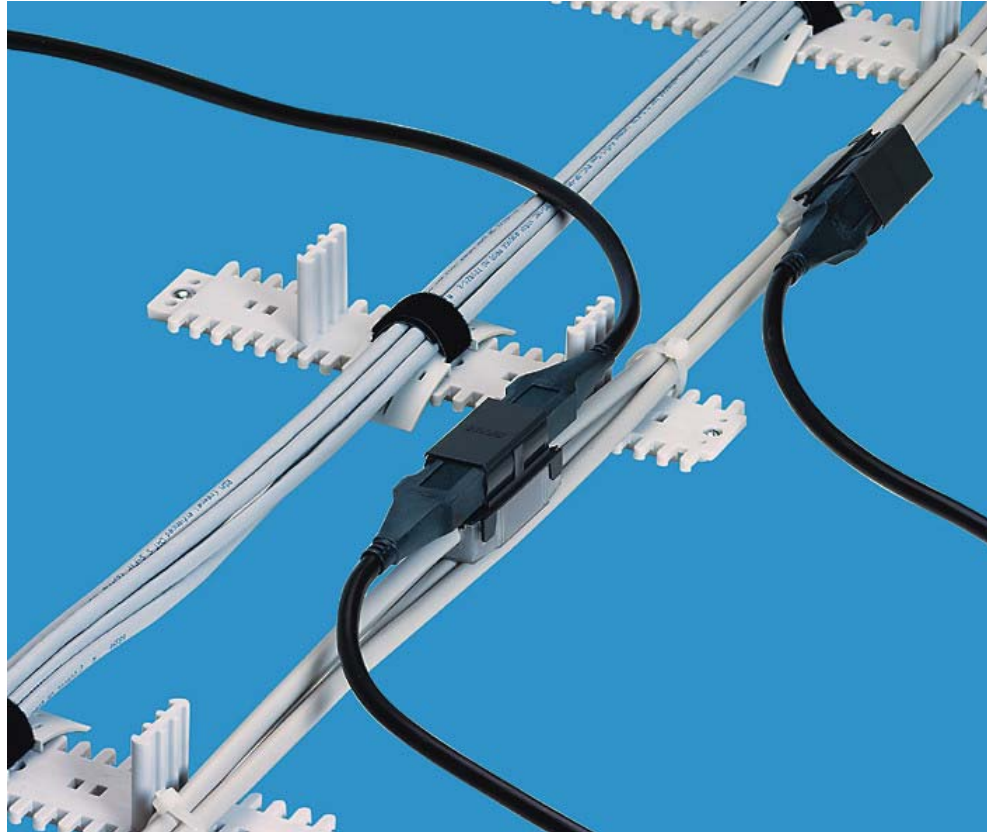

Coloured labels can be placed on both sides of the adapter outlets and plugs.

Fast and easy implementation of office cabling without distributing cabinets.

The wiring at any desired point creates a bus-type energy supply without distributor.

The compact dimensions and parallel outlets are a big plus in wall ducts.

Brilliantly simple – the RCO Power system is also designed for installing lighting cables.

Installation in seconds without additional tools – for you to benefit from in the next project, with the new 3-pole Cable Outlet from...
